Scott,

I contacted John Cochran at Sandia as Will Moats suggested. John referred me to Mike Skelly at Sandia. I called Mike and he was very helpful. I told him about the USGS report that mentions Sandia doing groundwater modeling of KAFB and the Sandia reports listed in the references section of the USGS report. He is going to look for those reports and send me what he finds.

Scott,

Here is Will's response below. But Kathy said that DOE is uncomfortable with us contacting Sandia since Sandia is a contractor to DOE. Kathy gave me the DOE contact David Rast (505) 845-5398. I'll give him a call tomorrow when I'm back in the office.

Tara,

You could try John Cochran with Sandia. His phone # is 505-844-5256.

Will,

Scott found this USGS report that says the following on page 5. Here's the link to the report.
<http://pubs.usgs.gov/wri/wri02-4200/pdf/wrir02-4200.pdf>

Several ground-water-flow models have been developed for subareas of the Middle Rio Grande Basin. A model of the Rio Rancho area was developed by Zimmerman and Updegraff (1996). Sandia National Laboratories (1997) constructed a model of the Kirtland Air Force Base area. Zimmerman and others (2000) developed a model to analyze a multiple pumping-well aquifer test in the vicinity of the Rio Grande in Albuquerque. A model of a single pumping-well aquifer test of a different area but also near the Rio Grande in Albuquerque was constructed by McAda (2001).

We were interested in getting some info on the model that SNL did of Kirtland AFB. Do you have any info on it or do you have a contact with the DOE that could get us this info?
